Weighting (inside) against Incorrect or Unanswered Questions (outside)

The chart below graph shows the average percent for the cohort answering the questions in the particular area correctly. It should be noted that here each area does not hold equal weighting.

Cohort Percentage Correct in each Area

### Correct against Incorrect/Unanswered for Cohort

This height of the bar shows the weighting of each area and the average number correct and incorrect answers.  
A large area of red would indicate an area of priority.

## Questions Sorted by Area Correct against Incorrect/Unanswered

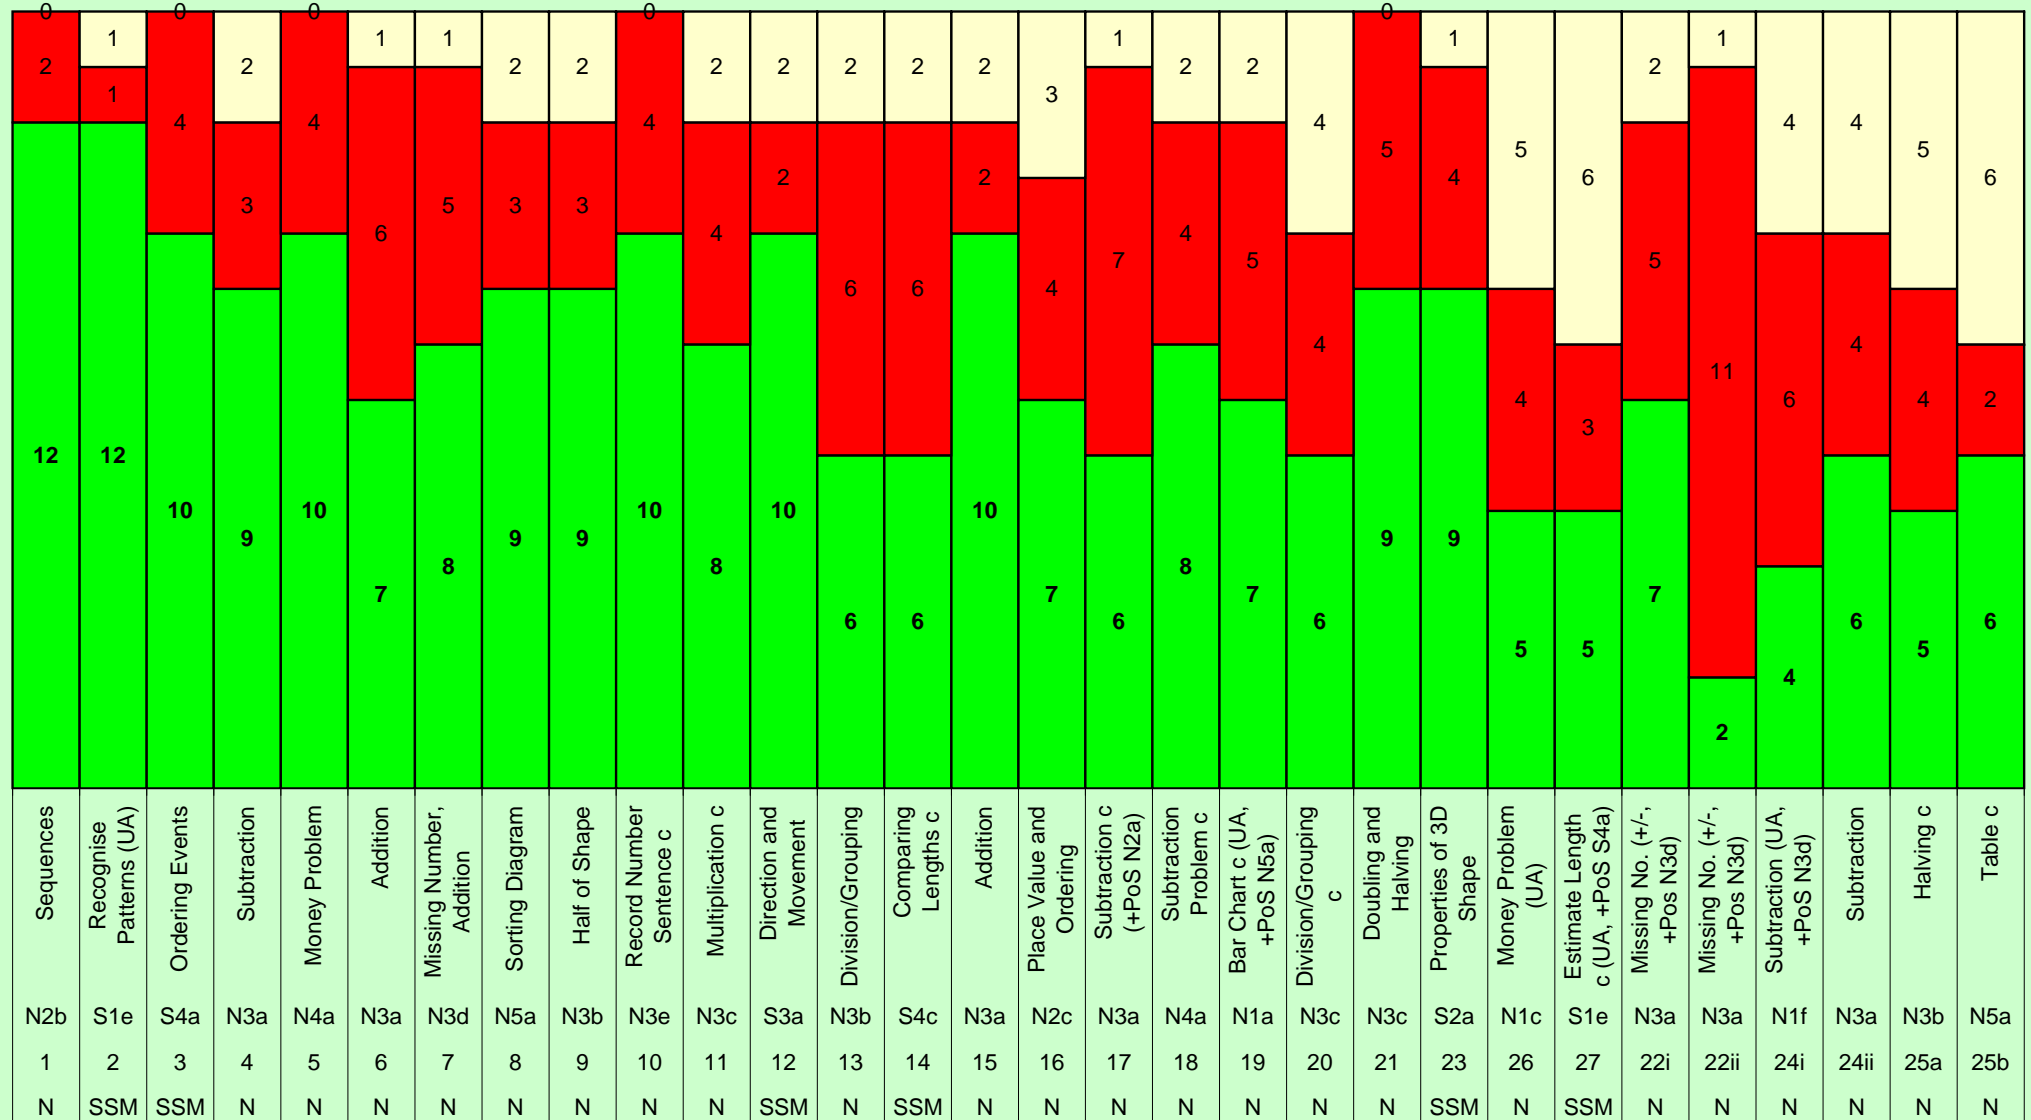

This graph shows the specific questions correct and incorrect (or unanswered) for the cohort, sorted by area. More red shows a greater need for improvement. Width of the strand indicates weighting.

### Questions Sorted by Correct to Incorrect Correct against Incorrect/Unanswered

This graph shows the specific questions correct and incorrect (or unanswered) for the cohort, sorted by number correct. More red shows area for focus.

### Questions Sorted by Question Order Correct against Incorrect/Unanswered

This graph shows questions unanswered, incorrect and correct for the cohort, sorted by question type. Less green shows a focus area.
