Instructions

You **may** use a calculator to answer any questions in this test.

Work as quickly and as carefully as you can.

You have **30 minutes** for this test.

If you cannot do one of the questions, **go on to the next one.**

You can come back to it later, if you have time.

If you finish before the end, **go back and check your work.**

Follow the instructions for each question carefully.

This shows where you need to put the answer.

If you need to do working out, you can use any space on a page.

Some questions have an answer box like this:

For these questions you may get a mark for showing your method.

Formulae

You might need to use these formulae in this test.

Trapezium

$$\text{Area} = \frac{1}{2} (a + b)h$$

Prism

$$\text{Volume} = \text{area of cross-section} \times \text{length}$$

1

This square is divided into three parts.

Part **A** is $\frac{1}{3}$ of the area of the square.

Part **B** is $\frac{2}{5}$ of the area of the square.

What fraction of the area of the square is part **C**?

Show your **method**.
You may get a mark.

 1
2 marks

2

Paulo makes a sequence of numbers.

He chooses a starting number and then subtracts equal amounts each time.

The **third number** in his sequence is **45**

The **tenth number** is **-32**

□	□	45	□	□	□	□	□	□	□	-32
---	---	----	---	---	---	---	---	---	---	-----

What is the **first** number in the sequence?

Show your **method**.
You may get a mark.

2
2 marks

3

Two numbers are in the **ratio 3 : 2**

One of the numbers is **0.6**

There are two possible answers for the other number.

What are the two possible answers?

3
2 marks

4

Here is a shape on a square grid.

The shape is rotated **90° clockwise** about point B and enlarged by a **scale factor of 2**

Use a ruler to draw the enlarged shape in its new position.

4
2 marks

5

Here is a sequence of shapes made from squares and circles.

shape number (n)	1	2	3	4
number of circles (c)	2	5	8	11
number of squares (s)	3	5	7	9

The sequence continues in the same way.

The formula for the **number of circles (c)** in **shape number (n)** is

$$c = 3n - 1$$

Use the formula to work out the **shape number** which has **104 circles**.

Show your **method**.
You may get a mark.

Write the formula for the **number of squares (s)** in **shape number (n)**.

$s = \dots\dots\dots$

6

150 people take part in a walk.

This chart shows the number of people still walking at different times.

Use the chart to estimate the **time** when **two-thirds of the people** are still on the walk.

6a
1 mark

What **percentage** of the people who started are **still on the walk at 3pm**?

Show your **method**.
You may get a mark.

%

6b
2 marks

7

Here is a circle with its **centre** at the point **(1,1)**

The point **(1,7)** is on the circumference of the circle.

For each of these points, put a tick (✓) to show if it is **inside** the circle, **on** the circle or **outside** the circle.

One has been done for you.

	inside the circle	on the circle	outside the circle
(3, 7)			✓
(7, 1)			
(1, -7)			
(-2, -2)			

7
2 marks

8

Here is a centimetre grid.

Draw **two** more lines to make a **quadrilateral** with an area of **18cm²**

Use a ruler.

8
1 mark

9

Find the value of t in this equation.

$$33 - 8t = 15$$

Show
your **method**.
You may get
a mark.

9

2 marks

10

Circle the two decimals which are
closest in value to each other.

11

In Class 6, **80%** of the children like crisps.

75% of the children **who like crisps** also like chocolate.

In Class 6, what percentage of the children like **both** crisps and chocolate?

Show your **method**.
 You may get a mark.

%

 11
2 marks

12

Lili and Julian each start with the **same** number.

Lili works out **half of the number**.

Julian works out **three-quarters of the number**.

The **sum** of their answers is **275**

What was the number they started with?

Show
your **method**.
You may get
a mark.

12
2 marks

13

A, B and C stand for three different numbers.

The mean of A and B is 40

The mean of B and C is 35

$A + B + C = 100$

Calculate the values of A, B and C.

Show
your **method**.
You may get
a mark.

A =

B =

C =

13
2 marks

14

The diagram shows a right-angled triangle and three parallel lines.

Calculate the size of angle x and angle y

Do **not** use a protractor (angle measurer).

$$x = \boxed{^\circ}$$

$$y = \boxed{^\circ}$$
