

School Stats Half Term

Information

What does it do?

School Statistics Half Term is a powerful tool that enables you to quickly query and find the number of pupils and percentage based on...

- A Year group or class.
- Attendance Information (new)
- Miscellaneous Criteria (new) - for gifted & talented, behaviour, setting, research criteria or whatever you need
- Gender
- Special educational needs
- Free school meals
- English as a second language
- Statements
- Ethnicity

Enrolment Status (allows to filter out pupils who have left, or are new)

It also enables you to set a year target for pupils, and reports when a pupils has met a target, or how many sublevels progress they need to reach their target. It will also show the current sublevel progress since the start of the year.

You can filter any of the above criteria to give specific feedback. For example, you may wish to know how boys are performing. Or you may wish to know which pupils have met their end of year target.

This version has also been used very effectively as a research tool.

What are the requirements?

You will need microsoft excel (some features will not work with versions older than 2002). You will also need to 'enable macros' when opening the spreadsheet.

What are the limitations in the demo?

The demo is limited to 24 pupils. The full version can have up to 1000. The demo has been set up with made up names, although you can edit any of the information.
