To break up calculations

Steps to Success:

1) Draw a line

2) Add the start number of the calculation

3) Make a step to the next 10 then 100

4) Add anything else

40+70

How can we do this?

Start with the bigger number:

Steps to Success:

1) Draw a line
2) Add the start number of the calculation
3) Make a step to the next 10 then 100
4) Add anything else

80+60

Start with the bigger number:

───────────────────

Steps to Success:

1) Draw a line

2) Add the start number of the calculation

3) Make a step to the next 10 then 100

4) Add anything else

140 - 60

Start with the bigger number:

Steps to Success:

1) Draw a line

2) Add the start number of the calculation

3) Make a step to the next 10 then 100

4) Add anything else

Try these:

600 + 500	1300 - 600	45 + 65
50 + 90	4500 - 700	83 + 23
400 + 700	180 + 90	68 + 147

Start with the bigger number:

Steps to Success:

1) Draw a line

2) Add the start number of the calculation

3) Make a step to the next 10 then 100

4) Add anything else
