

2026 national curriculum tests

Key stage 2

Mathematics

Administering the modified large print (MLP) version of Paper 1: arithmetic

WEDNESDAY 13 MAY 2026

CONFIDENTIAL: Please read the 2026 test administration guidance before opening this pack on **Wednesday 13 May 2026**.

You may open it up to 1 hour before test administration to adapt the papers to meet your pupils' needs.

Written STA approval is required to open it earlier.

Keep these materials secure until **Friday 22 May 2026**.

Pack contents:

- Administration instructions for the MLP key stage 2 mathematics test Paper 1: arithmetic (overleaf)
- One copy of the MLP Paper 1: arithmetic

For test administration

Key stage 2 mathematics test

The key stage 2 mathematics test consists of 3 papers. The papers must be administered in order. Pupils can have a break between Paper 1 and Paper 2. Test packs for each test must not be opened until the pupils are in the test room ready to complete the test, unless early opening is required to meet individual pupils' needs.

The scheduled day for the administration of Papers 1 and 2 is Wednesday 13 May.

The scheduled day for the administration of Paper 3 is Thursday 14 May.

Paper 1: arithmetic

The following information explains how to administer the modified large print (MLP) version of the key stage 2 mathematics test Paper 1: arithmetic. Modified test administration guidance is available at www.gov.uk/sta. If you have any questions, you should check with your headteacher or key stage 2 test co-ordinator before you administer the test.

Please follow these instructions correctly to ensure the test is properly administered. Failure to administer the test correctly could result in a maladministration investigation.

Format	<ul style="list-style-type: none"> • Paper 1: arithmetic consists of a single MLP test paper. • Pupils have 30 minutes to complete the paper, plus up to 100% additional time. • Changes have been made to the layout of some parts of the standard test paper to create the MLP version. • You must not refer to the standard test questions when administering this test.
Equipment	<ul style="list-style-type: none"> • Each pupil will need the equipment specified below: <ul style="list-style-type: none"> - a dark pencil or blue or black pen. • Rubbers are allowed, but please encourage pupils to cross out answers they wish to change instead of rubbing them out. • Pupils may use the following equipment, if this is normal classroom practice: <ul style="list-style-type: none"> - technical or electronic vision aids, including low vision aids such as closed-circuit television or OCR scanners - highlighter pens. • Pupils are not allowed: <ul style="list-style-type: none"> - calculators - tracing paper - other mathematical equipment, such as angle measurers or mirrors.
Assistance	<ul style="list-style-type: none"> • You must ensure that nothing you say or do during the test could be interpreted as giving pupils an advantage, for example, indicating an answer is correct or incorrect, or suggesting the pupil look at an answer again. • If a pupil requests it, you may read a question to the pupil on a one-to-one basis. • If reading to a pupil, you may only read words and numbers, but not mathematical symbols. This is to ensure that pupils are not given an unfair advantage by having the function inadvertently explained by reading its name. • The example below illustrates how to deal with a common situation: Question: Do I need to multiply when I calculate 95% of 240? Answer: I can't tell you, but think hard and try to remember. We can talk about it after the test.
Guidance for specific questions	<p>The calculation for question 10 has been split over two lines due to font size. Ensure the pupil knows it is one continuous calculation.</p>

Before the test begins	<ul style="list-style-type: none"> • Review the list of pupils with any particular individual needs, for example, pupils who may need a rest break, a scribe or a transcript made at the end of the test. • Ensure you know how to administer any access arrangements correctly. Please refer to the key stage 2 access arrangements guidance. • It is important that the pupils' names on their tests match the names on the test attendance register. Check with your test co-ordinator whether any pupil in your group is known by a different name in school, or has changed their name since pupil registration. This is so you can ensure the pupil writes the correct name on their test paper. • Write the school's name and DfE number on a board that is visible to all pupils. • Leave space on the board to write the start and finish times of the test.
What to do at the start of the test	<ul style="list-style-type: none"> • Check that seating is appropriately spaced and that no pupil can see another pupil's test paper. • Check that pupils don't have mobile phones or other disruptive items. • Check that pupils don't have any materials or equipment that may give them extra help. • Ensure each pupil who needs it has one MLP copy of mathematics Paper 1: arithmetic. • Write the start and finish times on a board so that all pupils can see them.
How to introduce the test	<ul style="list-style-type: none"> • It is important to brief pupils fully at the start of each test. Use this script to introduce mathematics Paper 1: arithmetic. <i>This is the key stage 2 mathematics Paper 1: arithmetic.</i> <i>You will need a blue or black pen or dark pencil.</i> <i>Write your name, date of birth, school name and DfE number on the front of your mathematics test Paper 1: arithmetic.</i> <i>[If any pupil's name differs from the name provided during pupil registration, instruct the pupil to write both names on the paper.]</i> <i>Open your test paper to page 2. I will read the instructions to you.</i> <i>You must not use a calculator to answer any questions in this test.</i> Questions and answers <i>You have 30 minutes, plus your additional time allowance, to complete this test.</i> <i>Work as quickly and as carefully as you can.</i> <i>Put your answer on the line or in the box for each question.</i> <i>All answers should be given as a single value.</i> <i>For questions expressed as common fractions or mixed numbers, you should give your answer as a common fraction, a mixed number or a whole number as appropriate.</i> <i>If you cannot do a question, go on to the next one. You can come back to it later, if you have time.</i> <i>If you finish before the end, go back and check your work.</i> Marks <i>In this test, long division and long multiplication questions are worth 2 marks each. You will be awarded 2 marks for a correct answer. You may get 1 mark for showing your method.</i> <i>All other questions are worth 1 mark each.</i> <i>If you want to change your answer, put a line through the response you don't want the marker to read. If you have to use a rubber, make sure you rub out your answer completely before writing a new one.</i> <i>Remember to check your work carefully.</i>

This section continues on the next page

How to introduce the test (continued)	<p><i>If you have any questions during the test, you should put your hand up and wait for someone to come to you. Remember, I can't help you answer any of the test questions.</i></p> <p><i>You must not talk to each other.</i></p> <p><i>Are there any questions you want to ask me now?</i></p> <p><i>I will tell you when you have 5 minutes left.</i></p> <p><i>I will tell you when the test is over and to stop writing.</i></p> <p><i>You may now start the test.</i></p>
How to deal with issues during the test	<ul style="list-style-type: none"> • It is impossible to plan for every scenario. Whatever action you take, pupil safety must always be your first consideration. • In the following circumstances, you will need to stop the test either for an individual pupil, group of pupils or for the whole cohort: <ul style="list-style-type: none"> - test papers are incorrectly collated or the print is illegible - an incorrect test has been administered - a fire alarm goes off - a pupil is unwell - a pupil needs to leave the room - a pupil is caught cheating. • If you need to stop the test: <ul style="list-style-type: none"> - make a note of the time - make sure pupils are kept under test conditions and that they are supervised - if pupils have to leave the room, ensure they do not talk about the test - speak to your test co-ordinator or a senior member of staff for advice about what to do next - consider contacting the national curriculum assessments helpline on 0300 303 3013 for further advice. • You should brief your headteacher on how the incident was dealt with once the test is over.
What to do at the end of the test	<ul style="list-style-type: none"> • If you need to make a transcript of a test script, complete it with the individual pupil at the end of the test, under test conditions. Particular care should be taken to ensure accurate transcriptions are made and the pupil's answers are not corrected or amended. • Ensure you inform your senior member of staff/test co-ordinator if you have made a transcript, or if a pupil has used a scribe, word processor or other electronic or technical device. This is so they can complete the appropriate online notification. • Ensure you have collected every test script, including any unused test materials. Return them immediately to the senior member of staff who is responsible for collating the tests. • Do not look at, review or amend pupils' answers in any way (unless it is necessary to make a transcript). If you tamper with or make changes to pupils' answers, it will be considered maladministration and results may be annulled. • Do not keep or photocopy test scripts for any reason. • All test materials, including any unused test papers, must be stored securely until Friday 22 May.
